

Fast Facts

FOUNDED:
2017

HEADQUARTERS:
Wilmington, NC

EMPLOYEES:
300+

CLIENTS:
300+ U.S. banks and
credit unions

OUR MISSION:
Apiture empowers financial institutions to know and serve their clients with the care of a traditional community institution, at the scale, speed, and efficiency required in today's digital world.

About Our Name

Our company name originates from the word aperture, which describes the variable opening in a camera lens. The unique spelling reinforces our API-first strategy and use of an open platform. In an industry that has historically been quite closed, Apiture's goal is to open up the banking industry and let in some light.

Innovative Solutions, Unmatched Support

Apiture delivers innovative digital banking solutions to U.S. banks and credit unions of all sizes, and we proudly give smaller community banks and credit unions just as much attention as our larger clients. Our flexible, highly configurable solutions meet a wide range of needs, from leveling the playing field with larger financial institutions to enabling unique, digital-only brands. Through our API-first strategy, our clients can meet demand for comprehensive online and mobile banking services while preserving a seamless user experience.

We provide:

- **U.S.-based support team** available 24x7x365
- **Around-the-clock monitoring** of our cloud-based platform and all integrations
- An assigned **customer success manager** whose name you know
- **Unparalleled access to our senior leaders**, including our CEO

Our History

Apiture was formed in 2017 as a joint venture between First Data Corporation and Live Oak Bank with a goal of reimagining the digital banking experience. Our unique history gives us the agility of a startup and the operational efficiency of an established company—the best of both worlds.

Invested In Your Success

We're **exclusively focused** on digital banking—we don't do anything else. That means 100% of our resources and R&D is dedicated to delivering the most modern, innovative solutions to our clients.

We make it easy to **take advantage of today's fintech ecosystem**. We connect to a full range of capabilities that consumers and businesses demand—without sacrificing the user experience.

We have a truly **flexible, client-driven approach**, with development options unlike anyone else in the industry. We work with our clients to enable the features most important to their user base, providing tailored solutions that help them stand out in the marketplace. Alternatively, clients can access our developer portal to take control and build a truly unique solution for their users.

The solutions you need to attract and engage users:

Consumer Banking: Includes our brandable, turnkey web and mobile user interfaces as well as integrations with hundreds of fintech partners and more than 40 cores—balancing choice and flexibility with speed to market.

Business Banking: Features the same user interface as our consumer solution for a seamless experience.

Account Opening: Provides a secure, digital process for consumers and businesses to open and fund new accounts within minutes.

API Banking: Offers unprecedented control over the user interface, enabling financial institutions and fintechs to create a truly unique experience with APIs and web components available in our developer portal.

Data Intelligence: Brings together previously siloed information to support acquiring new customers, cross selling and retaining business, and managing risk, with a dedicated team of data analysts available to supplement your in-house team or work on your behalf.
